"C"

Disconnect the negative battery terminal to prevent an accidental short circuit. Unclip the a/c vent panel ("A") and remove (2) Phillips screws exposed at the top of the factory head unit ("B"). Remove (2) Phillips screws below the climate control pod ("C"). Slide the head unit/climate control pod assembly from the dash cavity and disconnect the wiring. Remove (4) Phillips screws securing the climate control pod to the factory brackets ("D") and remove the pod.

2

Secure the **Mounting Brackets** to the **Radio Housing** with **(2) #8 x 3/8" Phillips Truss-head Screws** supplied.

3

Slide the climate control pod into the **Radio Housing** and secure with **(4) #8 x 3/8" Phillips Pan-head Screws** supplied

A) Strip wire ends back ½"
B) Twist ends together
C) Solder
D) Tape

Locate the factory wiring harness in the dash. Metra recommends using the proper mating adaptor and making connections as shown. (Isolate and individually tape off the ends of any unused wires to prevent electrical short circuit).
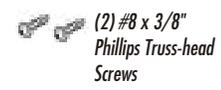

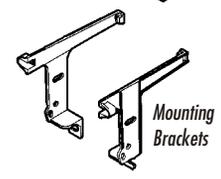

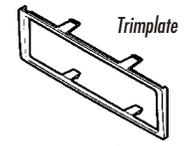

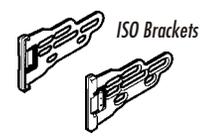

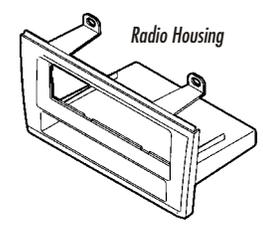

6

Re-connect the battery terminal and test the unit for proper operation. Mount the head unit/climate control pod assembly to the sub-dash with (4) Phillips screws previously removed in step #1. Replace the a/c vent panel.
